Abstract

Abstract are usually about 250 words, and for research articles they should give the background to the work, the methodology and the results. ICCK strongly encourages authors to use a structured abstract in the following style: (1) **Background:** puts the problem discussed in a broad context and highlights the purpose of the study, as well as the constraints faced by the study; (2) **Methods:** briefly describes the main methods or treatments used; (3) **Results:** summarizes the main findings of the article as well as the shortcomings of the work; and (4) **Conclusions:** points out the main conclusions or interpretations. The abstract should be an objective representation of the article and should not contain results that are not presented and confirmed in the main text or exaggerate the main conclusions.

Keywords: Keywords 1, keywords 2, keywords 3, keywords 4, keywords 5.

1 Introduction

Introduction should be given in this section [1]. Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat
